## Personal Summary

A talented student studying the BTEC level 3 in Computing at Highlands College, Jersey, with a proven record to deliver an effective and appropriate project within agreed timescales.

## Work Experience

[Graphic Design Studio / Paris, France / December 2017](#)

I had a week in Paris with Adrien Benard, working with Photoshop to retouch and edit professional photos for companies. I worked on editing advertisements for Air France, Axa, Citroën Orange, Perrier...

[Web Developer / Northampton, UK / June 2019](#)

I spent a week in Northampton developing a website for Storm Print. I took full responsibility to design, develop, publish and manage the site.

## Personal Projects

[Calculator / June 2020 / \[GitHub\]\(#\) - \[Google Play Store\]\(#\)](#)

I created a calculator using Flutter and Dart. This was my first mobile app and was quite a challenge. It has a theme selector and is available to download on the Google Play Store.

[Kimp / June 2020 / \[GitHub\]\(#\) - \[NPM\]\(#\)](#)

Kimp is an NPM package which generates unique identifiers. It can help with database names, post/image ids, and more. It's available to download through NPM and supports ES6 modules.

[Swooo\[sh\] / July 2020 / \[GitHub\]\(#\) - \[Website\]\(#\)](#)

Swooo[sh] is a URL shortener. It uses the MEVN stack (i.e. Node & Express as the back-end API, MongoDB as the database, and Vue.js as the front-end solution). It also has a very simple URL (swooo.sh) and supports custom IDs.
